Appl. No. 09/686,284
Reply to Office Action of May 30, 2003

As discussed during the interview, Fier discloses a game in which an award is provided if all of the designated values are obtained. In other words, if five of five symbols are selected, the player obtains the award. The amended claims provide an award where all but one of a provided number of player picks of selections must result in award symbols to achieve the winning combination. Accordingly, as discussed during the interview, these claims are now patentably distinguished over the combination of Thomas and Fier. Since all of the rejections are based on the combination of Thomas and Fier, it is respectfully submitted that these amendments to the claims overcome the rejection of these claims and the claims are now in condition for allowance.

An earnest endeavor has been made to place this application in condition for formal allowance and in the absence of more pertinent art such action is courteously solicited. If the Examiner has any questions regarding this Response, applicant respectfully requests that the Examiner contact undersigned.

Respectfully submitted,
